

## **New Idaho Behavioral Health Plan to Launch July 1, 2024**

Beginning July 1, 2024, Magellan Healthcare will manage the new Idaho Behavioral Health Plan (IBHP). Magellan will oversee mental health and substance use services for Idahoans who qualify, regardless of insurance coverage. All outpatient, inpatient, and residential mental health and substance use services currently administered by the state and private companies will be administered by the new IBHP and managed by Magellan.

The new IBHP contract is structured differently than the previous one, because Magellan Healthcare, Inc., will manage behavioral health services for the Divisions of Behavioral Health and Medicaid. Magellan will also manage the provider network for the Department of Juvenile Corrections. The IDHW Division of Behavioral Health will continue to manage state hospitals, the Center of Excellence, and court-ordered care.

In addition to maintaining IBHP services currently available to Idahoans, Magellan will introduce Intensive Care Coordination, including Wraparound Intensive Services (WInS), and build out Idaho's crisis system of care.

- The new IBHP will cover the following care and services:
  - Crisis services
  - Outpatient mental healthcare for adults and children
  - Inpatient mental healthcare for adults and children
  - Substance use disorder (SUD) treatment for adults and children
  - Psychiatric residential treatment facility (PRTF) services
  - Residential treatment center (RTC) services
  - Intensive Care Coordination (ICC), including Wraparound Intensive Services (WInS)
  - Coordinated specialty care for early serious mental illness (ESMI)
  - Home with adult residential treatment (HART) services
  - Youth Empowerment Services (YES) system of care services
  - Parenting with Love and Limits (PLL) services
  - Assertive community treatment (ACT)
